

Hi sir,

These are my project detail. I have given three tasks that I have completed.

1. At first task, I have created a website (page) like Bisma Eight, in which I have used only HTML and inline CSS. The github link and the URL of the website given below.

Code - [https://github.com/jagannath-swarnkar/HTML\\_projects/blob/master/project.html](https://github.com/jagannath-swarnkar/HTML_projects/blob/master/project.html)

website URL - [https://jagannath-swarnkar.github.io/HTML\\_projects/project.html](https://jagannath-swarnkar.github.io/HTML_projects/project.html)

2. At the second task, I have Scraped the data from Zomato, in which I used Selenium.  
The two tasks were given as-

a. task-1, I have scraped the locality names and the number of restraunts at each locality.

b. task-2, I show task1 and took user input to select locality and output restraunt detail of selected locality.

Code - [https://github.com/jagannath-swarnkar/Web-Scraping/tree/master/zomato\\_scraper](https://github.com/jagannath-swarnkar/Web-Scraping/tree/master/zomato_scraper)

3. At taks 3, I have created a Resistration form, in which I have created some validations as given in the task.

Code -

[https://github.com/jagannath-swarnkar/HTML\\_projects/blob/master/resistration\\_form.html](https://github.com/jagannath-swarnkar/HTML_projects/blob/master/resistration_form.html)

Website URL - [https://jagannath-swarnkar.github.io/HTML\\_projects/resistration\\_form.html](https://jagannath-swarnkar.github.io/HTML_projects/resistration_form.html)

Thankyou

Regards - Jagannath swarnkar
